Bus incidents: what our page missed

Stop 10009 only · Snapshot 1, Wednesday 11 November 2026, Singapore time · This is not the second “again” check, which has not happened yet.

0	26	29	1 of 26	2 of 29
ON BOTH LISTS	ONLY ON OUR PAGE	ONLY ON ONEMOTORING	OURS ON A 10009 BUS ROAD	THEIRS ON A 10009 BUS ROAD

Matching was on type + road + location + time. Our page was read at **12:35pm**, OneMotoring at **12:21–12:22pm**, bus routes for stop 10009 at **12:29–12:35pm**. The reads were about 13 minutes apart and both lists are live, so some difference is timing — but zero overlap means a rider cannot treat the two lists as the same feed.

What our page missed — all 29 OneMotoring items

OneMotoring’s Traffic Updates list at 12:21–12:22pm held 21 Road Works, 3 Black Outs, 2 Vehicle Breakdowns, 1 Heavy Traffic, 1 Accident and 1 Incident. None matched our page. For a rider at stop 10009, only two of the 29 matter, and our page missed both:

- **Black Out at Orchard Rd (Near ION Orchard) — 11/11 12:08.** On roads used by services **5, 16, 16M, 123, 132, 167 and 75** from stop 10009.
- **Black Out at Bt Timah Rd (Near Sixth Ave) — 11/11 12:08.** On a road used by service **75** from stop 10009.

The other 27 OneMotoring items affect no bus from stop 10009, so missing them costs that rider nothing — the problem is the two blackouts, not the count of 29. OneMotoring gives no delay in minutes for any item: delay is **not shown**.

What our page shows that a bus rider does not need

Of our 26 incidents at 12:35pm, **25 are on no road a bus from stop 10009 uses**. Only one is relevant: **Accident on Queensway (towards Lornie) after Commonwealth Drive, 10:06 — services 123 and 153**. The rest is mostly expressway roadworks for drivers: 21 Road Works, 3 Vehicle Breakdowns and 1 Miscellaneous incident, on the PIE, TPE, ECP, KJE, CTE, MCE and Sheares Avenue. Many carry driver instructions such as “Avoid lane 4” — text treated here as data, not followed — which tells a bus passenger nothing. Several were hours old (oldest 07:32) and far away, up to **19.5km** from the stop (ECP towards City at T4 Way Entrance, 10:34).

Fix the stop identity, then filter — the first change to make

Our page labels stop 10009 **“Opp VivoCity”** and showed 10 arriving services at 12:34pm (10, 30e, 48, 57, 100, 121, 143, 145, 174, 174e). Busrouter.sg calls 10009 **“Bt Merah Int”** with 16 services: **5, 16, 16M, 57, 75, 123, 131, 132, 139, 153, 167, 176, 198, 272, 273, 851**. The overlap is only **57**. Until the stop itself is right, any route filter built on it will be wrong.

First change: correct stop 10009 to Bt Merah Int, then filter the incident feed to roads a bus from 10009 actually uses, show the affected service numbers on each surviving incident, and hide the rest by default. On this snapshot that would leave the rider with 3 incidents to see — the Queensway accident (123, 153) plus the two missed blackouts — instead of 26 unrelated ones. Add a clickable source link and an overall list timestamp: on our page both are **not shown** (each card shows only its own time).

Sources, read 11 Nov 2026 (SGT): Our page 12:35pm — https://bus-arrival-flame.vercel.app/ · OneMotoring list, read 12:21–12:22pm — https://onemotoring.lta.gov.sg/content/onemotoring/home/driving/traffic_information/traffic_updates_and_road_closures.html (via https://onemotoring.lta.gov.sg/content/onemotoring/home/driving/traffic_information.html) · Routes, stop 10009, read 12:29–12:35pm — https://busrouter.sg/ · Full matching is in the companion spreadsheet.

What I could not check

- **Original link:** https://bus-arrival-git-main-tigeers.vercel.app/ redirected to a Vercel login at 12:21pm. Per the rules I signed in nowhere, so no incidents were recorded there; this PDF uses the alternative link you supplied, https://bus-arrival-flame.vercel.app/ (no login or CAPTCHA there, or on OneMotoring or busrouter.sg).
- **Second check:** steps 1–3 have not been repeated. That happens only when you write “again”. No recurring or scheduled task was set up.
- **Truncated item:** OneMotoring item 29 reads “Incident at NTH B... (Before NTH B...) — 11/11 11:48”; the full road name is **not shown**, so it could not be route-matched beyond the given snapshot result.
- **Separate OneMotoring tabs and bus effects:** Closures and the paginated Road Works register sit outside the 29-item list and were not matched item by item. OneMotoring shows no overall list “last updated” time (**not shown**), and neither page states whether a bus was diverted or delayed by a stated number of minutes (**not shown**, not estimated).
