Bus incidents - Snapshot 2: what our page missed

Stop 10009, Bt Merah Int · Wednesday 11 November 2026 (SGT) · Our page read about 2:39pm · OneMotoring Traffic Updates read 2:40-2:41pm · busrouter.sg read 2:41-2:45pm · Snapshot 2 only - no recurring task was set up.

Verdict: 24 unique incidents - 17 on both lists, 1 only on ours, 6 only on OneMotoring. Our page listed 18 incidents; OneMotoring listed 23. Matching is on type + road + location + time. This is a clear improvement on Snapshot 1, when overlap was 0 and the page called stop 10009 “Opp VivoCity”. It now correctly calls it “Bt Merah Int” with the same 16 services as busrouter.sg: 5, 16, 16M, 57, 75, 123, 131, 132, 139, 153, 167, 176, 198, 272, 273, 851. The remaining problem is bus relevance, not list matching.

What our page missed - 6 incidents only on OneMotoring

None of the six is on a road named in any stop-10009 service’s stop list on busrouter.sg either, so a bus rider lost no confirmed bus-road warning. They still show the page is not a complete copy of LTA’s list:

- **Heavy Traffic** - BKE (towards Woodlands) at Woodlands Checkpoint Exit - 11/11 14:09.
- **Road Works** - ECP (towards City) after Rochor Rd - 11/11 13:50.
- **Road Works** - MCE Tunnel (towards AYE) at Fort Road Entrance - 11/11 10:35.
- **Road Works** - ECP (towards City) at T4 Way Entrance - 11/11 10:34.
- **Road Works** - KJE (towards BKE) before Sungei Tengah Rd - 11/11 09:30.
- **Road Works** - TPE (towards SLE) before Tampines Ave 7 - 11/11 09:16.

The 1 incident only on ours was **Road Works on AYE (towards MCE) after Clementi Ave 6, 11/11 14:18**. It was not in OneMotoring’s Traffic Updates list at 2:40-2:41pm, so its source and currency cannot be confirmed from OneMotoring. A separate incident-level “last updated” time on OneMotoring is not shown; delay in minutes for any incident is not shown on either list.

What it shows that a bus rider does not need - all 18, on the independent check

Our page says “18 incident(s) reported on routes used by buses from Stop #10009” and gives an “Affects Bus” list for every incident - mostly 132 and 153, plus 5, 57, 131, 139, 75, 176 and 198. That claim is treated here as data from the page, not as proof. Checked independently, busrouter.sg publishes **no textual road list** for any service. In its stop-name text, **none** of PIE, TPE, ECP, KJE, AYE, BKE, MCE Tunnel, Sixth Avenue, Clementi Ave 6, Jalan Eunos, Punggol Rd, Pasir Ris Drive 8, Upper Changi Rd East, Brickland Rd, Jurong East Ave 1, Changi South Ave 3, Tampines Ave 7, Rochor Rd, Fort Road or Sungei Tengah Rd is named in any 10009 service’s stops. So **none of the 24 incidents lies on a road named in a 10009 service’s stops**. “None” means that text check only - it is not certified proof a bus never travels the road.

A rider also does not need driver lane advice. Wording such as “Avoid lane 4” was recorded as data and not followed. Two further trust problems: the header “Incident list updated: Snapshot as of 12:35 PM SGT” is stale, because incidents on the page run to 14:22; and no separate source link for the incidents is shown on the page - the source link is not shown.

The change to make first - fix the corridor matching

Only label an incident as affecting a bus when the incident road is a road that bus actually uses, as shown on busrouter.sg. Drop, or clearly label as non-bus, expressway incidents that only share a nearby place name. An exit or entrance name is not the road itself: TPE at Loyang Ave Exit is not Loyang Ave, PIE after Toa Payoh Exit is not Toa Payoh, and ECP after Rochor Rd is not Rochor Rd. Until that matching is fixed, remove the “on routes used by buses from Stop #10009” claim and the per-incident “Affects Bus” labels, and refresh the stale 12:35pm header to the true snapshot time.

What I could not check

I could not confirm physical road use from busrouter.sg text alone: it shows routes as a map plus stop names, with no textual road list, so a road travelled between stops, with no stop named after it, is not named in the text. I could not verify the AYE-only incident against OneMotoring, or check LTA’s separate Closures and planned Road Works directories as live incidents - they are scheduled directories, not the Traffic Updates list. Both lists are live and will have changed after the read times above. No site in this snapshot asked for a login or showed a CAPTCHA; nothing was signed in, bought, booked, paid or sent.
